DETAILED ACTION

Specification

The abstract of the disclosure is objected to because the abstract contains “means” in line

5. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 9 and 10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 9 is indefinite because it recites “a conventional stapler” in lines 2-3.

It is unclear as to whether the conventional stapler is part of the claimed invention.

Claim 10 is indefinite because it recites “the conventional stapler” in line 2.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3721

Claims 1-2 and 9-10 are rejected under 35 U.S.C. 102(b) as being anticipated by K.M.Vogel (US 3,209,976).

With regard to claim 1, Vogel discloses a device having a holder (16), a paper stop (60) retained by the holder, an adjusting mechanism (adjusting gauge) for adjusting the paper stop in relation to the holder.

With regard to claim 2, the adjusting mechanism comprises a latching mechanism (59) for latching plurality of predetermined latching positions between the paper stop and the holder (19 longitudinal slot).

With regard to claim 9, the holder can be fastened to a conventional stapler.

With regard to claim 10, the holder has clamping element (59) for fastening the on the conventional stapler.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by S.A.Crosby (US 2,073,958).

With regard to claim 1, Crosby discloses a device having a holder (A), a paper stop (22) retained by the holder, an adjusting mechanism (21 aligning means) for adjusting the paper stop in relation to the holder.

With regard to claim 2, the adjusting mechanism (21 aligning means) comprises a latching mechanism as shown in Figure 8 for latching plurality of predetermined latching positions (20 longitudinal slot) between the paper stop (22) and the holder (A).

With regard to claim 3, the latching mechanism is formed by a resilient pressure-exerting component (see flexible projecting portion of 22) on the holder (A) and a plurality of apertures (20 slot) along the paper stop (22).

Art Unit: 3721

Allowable Subject Matter

Claims 4-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Refer to attachment for notice of references cited and recommended for consideration based on their disclosure of limitations of the claimed invention.
